👤 ABOUT ME

I am a full-stack developer specialized in Front End web applications. I excel in collaborative environments, striving to foster a comfortable environment for teamwork. I place a strong emphasis on
empathy towards my teammates to facilitate project progression.
My goal is to bring my creativity, dedication and knowledge to IT teams. I am always willing to offer help and equally open to learning, with the goal of continuous professional growth.

🎓 EDUCATION

Coding Bootcamp
Plataforma 5 Code Academy
09/2023 – 12/2023
Training in full-stack development with Javascript, with more than 8 hours of programming per day, using PERN and MERN stacks. Theoretical-practical mode applying agile methodologies, pair programming and collaborative work methodologies (SCRUM).

CourseIt
05/2022 – 07/2022
Frontend development course, in which we saw the basics of technologies such as HTML, CSS and Javascript, with a theoretical-practical method.

Git ⎸ Material UI ⎸ Bootstrap ⎸ Bulma ⎸
Scrum ⎸ Tailwind CSS

🌐 LANGUAGES

English — C1 ⎸ **Portuguese** — B1

🗂 EXPERIENCE

Mi Turno Web App ⬈
Frontend Developer
It is a web application that facilitates the booking of appointments for companies with physical branches. The system allows to manage the flow of customers in each branch and customize the number of simultaneous customers per branch and define ranges schedules and duration of shifts.

The Movie Party
Full Stack Developer
This is a website that presents a collection of movies and TV series, each accompanied by detailed information and their respective trailers. Customers can create personalized profiles, allowing them to easily browse and search for content by name. In addition, the site includes sections showcasing trending movies and series.

Fast Delivery ⬈
Frontend Developer
In a collaborative team using SCRUM methodology, I have contributed to the development of the Front End of a logistics application for a company with hundreds of delivery drivers. The app allows delivery drivers to register, log in and select the packages they will deliver on a daily basis. It also provides the company with a view to monitor the operation, visualizing the packages assigned to each delivery person and their corresponding statuses.

Don Basilio ⬈
Frontend Developer
Website designed for the hairdresser 'Don Basilio', working for the software development agency 'SeptemDev Studio'. This app allows to give a presentation of the hairdresser in question and show the work done throughout his career. As a main objective, the site allows to schedule appointments for his clients to go to get their hair cut. These appointments are scheduled in a virtual calendar, where the hairdresser can have control of all the appointments taken and have a better organization.

SeptemDev Studio ⬈
Frontend Developer
This website was developed for the web development agency "SeptemDev Studio". It is a comprehensive platform that allows to know in depth how they work, showing in detail the projects done for various clients, along with their respective solutions and results. It also presents the talented team of SeptemDev Studio, highlighting their skills and roles within the agency, and offers a clear view of the work methodology employed.
